

# Simple Way to Connect Alexa to Internet

---

- First, download the Alexa app on your smartphone or computer.
- Open the Alexa app and sign up for a new Amazon account.
- Then open the settings menu on the app.
- Select the type of your Echo device.
- Follow the instructions on the screen and complete the process.
- Once the process is complete the Alexa will let you know.

My Echo not flashing Orange Light Ring

If your Echo smart speaker is not flashing Orange light, then press and hold the Action Button for 5 seconds. When the Echo light turns orange, follow the steps below:

- - Now connect Alexa to the internet. For this, go to the Wi-Fi settings of your smartphone and select the Amazon network.
  - Now return to Alexa app and click on connect to wi-fi option.
  - A list of Wi-Fi networks will appear, select the network you want to connect with Alexa.
  - Once Alexa connects to the internet, a message will be displayed on the screen to let you know that you are connected.

## How to Connect Alexa App to New Wi-Fi Network

---

If you want to connect Alexa to the internet which you got recently or want to update the existing Wi-Fi network with a new password then step ahead to the following points.

- Open up the Alexa app on your smartphone.
